

# Hotel Adlon Kempinski

In the suites of the world-famous hotel, DUSCHOLUX is turning old into new.

Here, tourists from all over the world encounter Berlin's city history. The traditional Hotel Adlon Kempinski, a legend of the German hotel industry, is located in the centre of Berlin, directly at the Brandenburg Gate. Built in 1907 by Lorenz Adlon, the world-famous hotel with 307 rooms and 78 suites has represented classic luxury and hospitality at the highest level ever since. The current building was completed in 1997 and extends over six floors, where high-quality materials reflect the spirit of the house down to the finest detail.

**Customer:**

Hotel Adlon Kempinski Berlin

**Scope of delivery:**

Collection 3 Plus and Collection 3C, Dimensions, delivery and assembly

**Practical advantages:**

Frameless construction, flush fittings and CareTec® Pro glass finishing for cleanliness without water stains.

**Date of implementation:**

2020 to 2021

# Two names with tradition.

## **Convincing individuality.**

In the bathrooms of the suites, the contrast between black granite and white marble in combination with warm wood panelling is impressive. The frameless Collection shower enclosures from DUSCHOLUX fit perfectly into this ambiance. Step by step, they are replacing the original glass walls to create a harmonious arrangement of contemporary interior and historical character. Individually fabricated for every bathroom, the Collection product world reveals its true greatness here. Because no two shower enclosures are the same.

## **Set into the niche.**

The niche installations are custom fitted. Whereas Collection 3C shower partitions are installed in some of the bathrooms, Collection 3 Plus models are used in those bathrooms with steam showers. An additional side panel – mounted crosswise at the top – closes off the niche. The swing doors can be opened inwards and outwards, and the discreet handles harmonise perfectly with the existing bathroom fittings. The CareTec® Pro glass finishing also makes the shower panels especially easy to clean.

If you have any questions or wish to see more pictures of the project, further information is available on our website.
