

Viva sliding doors

New product at ISH 2019 / Shower enclosures

Date: 11.03.2019

Refined style icon

Reduced-frame sliding doors with no wall profile and a flat top profile with a concealed roll guide are what give the DUSCHOLUX Viva shower enclosure its particularly transparent look. The customisable guide profile in a glass or stone effect is a new feature. Combined with the perfect PanElle wall panelling, it gives a room a harmonious feel with a personal touch. The innovative DUSCHOLUX CareTec Pro glass finishing comes as standard with this model, as does the soft-close function for smooth opening and closing. And the Push & Clean function makes it really easy to swing the doors out for cleaning. Custom sizes and flexible installation options give Viva plenty of scope for your individual design preferences.
