

DUSCHOLUX CareTec® Pro

The unique glass finish. Cost-effective, durable and easy to maintain.

DUSCHOLUX CareTec® Pro adds tangible value to the bathroom through innovative technology. Its permanently dirt-repellent surface significantly reduces cleaning effort.

This saves time and money while helping to protect your health.

Features

- 5-year guarantee on the easy-cleaning effect* of glass treated with CareTec® Pro at the factory
- 10-year guarantee against glass corrosion
- Exclusive to DUSCHOLUX shower enclosures
- Developed in collaboration with an EMPA spin-off, the Swiss Federal Laboratories for Materials Science and Technology
- Applied directly at the factory using state-of-the-art technology

* According to industry standards, a surface is considered “easy to clean” when its static contact angle is at least 70 degrees. The larger the angle, the more easily water beads up and rolls off.

DUSCHOLUX

Simply, a feel-good experience.

Saves time.
The water-repellent effect eliminates the need to squeegee the glass after showering. Depending on the water hardness, cleaning the shower enclosure with a microfibre cloth every one to two weeks is sufficient.

Uses fewer cleaning products.
DUSCHOLUX CareTec® Pro reduces the adhesion of limescale and dirt. This makes cleaning easier and eliminates the need for limescale removers.

Untreated glass

Glass treated with CareTec® Pro

Fewer chemicals.
Compared to untreated glass, CareTec® Pro reduces the amount of chemicals released into the air and discharged into the water cycle. Less frequent cleaning also helps save water.

Long-lasting.
The surface treatment provides lasting protection against glass corrosion, extending the service life of the shower enclosure.

CareTec® Pro included.
CareTec® Pro comes as standard on many DUSCHOLUX shower enclosures. The treatment is applied directly at the factory, with no need to order it separately.

Developed in collaboration with:
spin-off | Empa
