

# Collection 2 Maritim

Highest quality at sea. Shower enclosures from DUSCHOLUX specially developed for yacht design.

Yacht design stands for elegance, longevity and exclusivity. The high demands made by clients can only be fulfilled by suppliers who share the same values. We cover exactly these needs as a Swiss shower enclosure manufacturer with over 50 years of experience. The newly developed Collection 2 Maritim shower enclosure impresses with its frameless design in combination with a swing door that remains closed even during rough conditions thanks to its integrated door lock.

## Features

- Frameless shower wall
- Glass thickness 8 mm (fixed panels), 6 mm (door panels)
- Platinum Silver Glossy fitting colours
- Swing doors open inwards and outwards
- Lift-and-lower mechanism in the door hinges for gentle care of seals and a self-closing function.
- Fittings and handle with angular or classic oval closure
- Shower enclosure height up to 2100 mm, special dimensions on request

# A harmonious balance between design and functionality.

Without profiles, with rectangular or classic oval hinges and a special closure for use on the high seas. The Collection 2 Maritim frameless shower enclosure exhibits a particularly clear form design. The interaction between large transparent glass elements and the elegant fittings is perfectly harmonised. The special locking function means that the door can be locked securely. Easy opening and closing of the swing door is achieved thanks to beautifully designed hinges with an integrated lift-and-lower mechanism.

The Collection 2 Maritim is available in a variety of installation options and can even be supplied as a special installation, should the specific architecture require it. Customers looking for variety in glass will find a wide selection with TSG clear, satinised or special motifs.
